

## Welcome to Principles of Mathematics 12

---

Principles of Mathematics 12 is a required course in mathematics for entry to advanced college or university courses.

### To get started

---

Register at the learning centre. Put a deposit on the textbook. Buy or borrow a [Ti-83 plus](#) Calculator (Texas Instruments). You will need a WebCT ID and Password to login to your course. If you don't receive an ID and password at registration, phone 604-517-6191 and ask for it. If you are in the ALC you may ask any teacher.

### Textbook

---

The text for this course is Mathematics 12 by Addison Wesley. Deposit is 100 dollars. You will receive a full refund when you return the book.

The course contains eight units and tests. There is no final or midterm exam. All tests are written at the learning centre. Allow yourself 2 hours to write each one.

Help: Randy Decker is the teacher for this course. You may contact him in the lab 3 pm to 8:30 pm Monday to Thursday.

- Unit Zero Refresher- This a review of math topics.
- Unit One - Math Toolkit
- Unit Two - Trig Angles
- Unit Three - Trig Real Numbers
- Unit Four -Trig Identities
- Unit 5 - Conic Sections

Your final mark is the sum of the points you earn divided by the total number of points available.

If you have questions, ask an instructor in the lab or click on the discussions link on the home page of your course.
